

Detectable Warning Systems, Inc. Redi-Mats

Detectable Warning Redi-Mats® are the easy, economical and durable solution for meeting ADA, FHWA and other regulations which require a tactile warning surface for visually impaired pedestrians. With their exclusive peel away backing and stainless steel anchors, Redi-Mats provide the easiest most operator friendly installation process in the industry!

Five Steps..... Five Minutes!

1. Peel

2. Place

3. Roll

4. Drill

5. Screw

DETECTABLE WARNING SYSTEMS

Construction

Molded from tough long lasting polyurethane, Redi-Mats are ideal for curb ramps, hazardous vehicular areas and transit platforms.

Adaptability

Ideal for new and retrofit applications, Redi-Mats can be easily and permanently applied to a variety of surfaces. Their flexible construction allows them to conform to existing curb ramp contours and to adapt to the normal variations on concrete sidewalks. They can be easily cut on the job site to adapt to many special situations.

Readily available

Our nationwide network of distributors stock the complete line of Detectable Warning Mats for immediate delivery to your job site and are knowledgeable about local regulations and requirements for detectable warning surface products.

Detectable Warning Systems

Detectable Warning Systems has been providing detectable warning mats since 1994, with thousands of successful application throughout the United States.

Simple 5 Step Installation

Peel, place, roll, drill and screw. That's it! With their innovative peel away backing and stainless steel anchors, Redi-Mats provide the most installer- friendly mat in the industry!

Colors

Redi-Mats are available in three colors to meet a variety of situations and preferences: Yellow-Federal Standard 595B #33538, Black and Brick Red. UV inhibitors included in the process provide protection from fading and discoloration. Custom colors are also available by special order.

Pattern

Available in the "in-line" or square pattern as recommended in the PROWAAC Final Report as well as the original offset pattern required by ADAAG. The 2.35" spacing of the domes in a square pattern allows for improved access for wheelchair users.

Five-Year Warranty

Redi-Mats carry a five-year manufacturers limited warranty against defects in workmanship and materials.
